

New York Stock Market

New York, May 26.—The underlying strength of the stock market which has been apparent through the week in spite of the unusually severe pressure that was exerted, led to an advance in prices to-day when the pressure was relaxed. Since the beginning of the week the selling movement has been conducted on a large scale, and although some substantial recessions were brought about, the support which was offered was so effective that further operations on the short side were deemed hazardous. Speculative selling was restricted to-day, and the opening of the market brought general advances which were later extended to a full point or more for the greater part of the active list. Much of the recent selling was said to be for the short account, the extension of which is believed to have strengthened the position of the market. Bear traders who attempted to cover found that in spite of the week's heavy selling, the supply of stocks was almost the smallest of the season.

The volume of trading diminished considerably to-day. Total operations aggregated about 300,000 shares, which is considerably under the recent average. The electric stocks extended their gains largely, but changes before the day in most cases were small, the early gains being cut down before the close. The slackening business was attributed to the uncertainty attending next Monday's Supreme Court decision on the general state of indecision respecting the steel and iron trade. The Supreme Court decision in the American Tobacco case is looked for by Wall Street on Monday, and in view of the fact that the decision may be in favor of the tobacco companies, the reduction in price of the stock of some companies it was said that orders for bars were coming in more freely. It was reported that more definite news to the situation might be had following a meeting of stock makers early next week. As a factor in speculation, the "open market" seems to have mislaid fire, to the chagrin of a large and aggressive bear party.

Advices from abroad intimate that the character will be taken up in London and Paris following the approaching holidays at those centers. It is understood that some of the proposed banking has to do with American securities, in this connection it is again reported that the strengthening of the man issues may soon be announced. The strength of Atchafalaya may have been a natural outgrowth of the latest Paris dispatches, which assert that arrangements for lifting the shares of the company have been completed. It was also reported that application has been made to list American Telephone and Telegraph in the same market.

The April reports of the Harriman roads show a further strengthening of policy which was adopted generally early in the spring had been pursued effectively by these companies. Gross earnings of each road fell off about \$700,000, but decreases in net were not so great. Expenses which amounted to \$380,000 for the year, and \$530,000 for Southern Pacific. The Colorado and Southern converted a loss in gross of \$200,000 into a gain in net of \$44,000, by reducing expenses by \$254,000.

The movement of gold to Canada assumed larger proportions to-day, shipments aggregating \$1,600,000. The total for the year is now \$7,600,000, whereas less than \$1,000,000 had been forwarded up to this time last year.

Bonds were unchanged on call. Total sales for the day, 302,700 shares.

RICHMOND STOCK MARKET.
